Company:	Capestart Pvt Ltd, Nagercoil. (From 06 Feb 2020 to 6 July 2021)

- **Dacke**

Client	: Dacke
Category	: Cross Platform IOS Application
Role	: UI & Development for IOS App Release
Environment	: .Net C# with MVVM pattern, Xamarin Studio
Description	: Dacke Mobile application was a tool to site managers to register the inventory of Damaged/to be changed products. This application helps the site engineers to maintain the product records of an assigned project with a structured pattern and able to mark the products with the uniquely Identified label identifiers. The Site Manager/Supervisor can print these labels with HoneyWell LTE printers. The image capturing & file uploading options helps to know about the product in much detail manner.

- **IdrottOnline**

Client : Riksidrottsförbundet
Category : Cross Platform Mobile Application
Role : UI & Development for 1stPhase Release
Environment : .Net C# with MVVM pattern, Xamarin Studio
Description : IdrottOnline is a common business system for Swedish sport and represents the base for all communication and administration between the member association and federation.
