It's a product for schools which serves them to make their school management easy. With the help of this portal the school management, students, teachers as well as parents would be benefited. iCare, an id to care students, is a complete RFID based automatic student monitoring system. This automated school management system improve the school management process more easy and efficient. Also provide better interaction among students, teachers, parents and the authority. Offer absolute security for the students and also provide perfect students tracking to the parents. iCare is based on radio frequency. Automatic identification technology to ascertain the student entrance and exits from the institution. iCare also provides a complete ERP for the school management.

Responsibilities:

- Involved in Coding, Design and Test Phases.
- Involved in writing Queries, Stored Procedures.
- Developed application logic using C#.
- Used N-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C#.
- Used Crystal Reports to generate the reports.
- Written stored procedures, triggers using SQL in SQL SERVER 2008.
- Worked intensely on the User Interface.

PROJECT #4: RESTAURANT MANAGEMENT SYSTEM :

TOOLS : C#.net, .Net framework4.0, SQL server 2008, Ado.net.

ROLE : Software Engineer.

Project Description:

Tomato presents your restaurant menu in a digital form which is interactive with striking visuals. It is an easy-to-use solutions that is highly customizable to meet every requirement of any restaurant type. It is an automated process allows your staff to attend and service your guests more efficiently increasing the rotation of customers per table and less waiting time for the customers. It's increase your average bill value by up selling items, specials, etc. by promoting them with pictures and up-to-date information.

Responsibilities:

- Involved in Coding, Design and Test Phases.
- Involved in writing Queries, Stored Procedures.
- Developed application logic using C#.
- Used N-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C#.
- Used Crystal Reports to generate the reports.
- Written stored procedures, triggers using SQL in SQL SERVER 2008.
- Worked intensely on the User Interface.

PROJECT #5: BULK SMS (PRODUCT):

TOOLS : C#, Asp.net MVC, HTML, AngularJs, JavaScript, Ajax, JQuery, SQL server 2008, Ado.net.

ROLE : Software Engineer.

Project Description:

It's a web based Enterprise wide application which gives users to do bulk sms and features related to sms.

Responsibilities:

- Involved in Coding, Design and Test Phases.
- Involved in writing Queries, Stored Procedures.
- Developed application logic using C# and Asp.net MVC.
- Used N-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C#.
- Written stored procedures, triggers using SQL in SQL SERVER 2008.
