Involved in the UI design for Silverlight pages and other Aspx pages.
Performed Unit Testing for the developed User Stories.

PROJECT: FEEDBACK APPLICATION(MOBILE APPLICATION)

CLIENT: FORTIS ESCORTS HEART INSTITUTE

The project is mainly focused on patient feedback about the hospital. The project mainly to take feedback from inpatient and out patient. The application is developed cross platform using PhoneGap. jQuery Mobile is a touch-optimized web framework (also known as a mobile framework), more specifically a JavaScript library, currently being developed by the .Net project team. The development focuses on creating a framework compatible with a wide variety of smartphones and tablet computers, made necessary by the growing but heterogeneous tablet and smartphone market. The jQuery Mobile framework is compatible with other mobile app frameworks and platforms such as Phone Gap.

Roles/Responsibilities: Software Engineer

Create web service based on Rest architecture for cross platform .
Responsible for designing frontend GUI screens using HTML 5 with JQuery Mobile.
Create HTTP Method Commonly used in Rest based architecture (Get, Post, put, Delete).
Involved in writing client side validations, making sure the pages validate and fixing JavaScript errors.
Extensive use of ADO.NET in the data access layer to access and manipulate data in the database the data was then passed up the layer structure using typed datasets.

PROJECT: PET LICENSE

CLIENT: MUNIDEX 174 Route 17 North

Suite 202, Rochelle

Park, NJ 07662

(201) 291-1000

PET LICENSES For all your Dog and Cat licensing requirements. Prints the VPH 10, full audit trail, automatic renewals and much more. The Application was developed using ASP.NET, C# ADO.NET, HTML, JavaScript, jQuery is using a SQL server 2008 database for the content. The backend and front end of the Application is complete, fully functional and validated using the jQuery validation. The system involved a tiered model, with well-defined layers for the presentation, business and data access layers. The application is developed with an Entity-Framework.
