PROJECTS

Description

The Aim of this project is to validate fields of different kinds of forms. For eg. Healthcare (HCFA Forms), Union Billing (UB Forms), Dental, Invoice Forms, etc. This product mainly developed for validating each and every fields in the forms. With the help of KomodoFCB Rule Manager, Bussiness rules will be created as per the customer requirement which will be in the syntax of

If.. then.. else.

Responsibilities

- Playing role as Developer.
- Creating new functions for the business rules.
- Supporting configuration level issues.

PROJECTS:

PROJECT #1		Description
Project Title	:	KomodoFCB Rule & Lookup Manager
Client Name	:	SourceHOV
Period	:	Jan 2016 to Dec 2016
Role	:	Developer
Technology Used & application type	:	Asp.net, C#, SQL & Windows application.

Description

The created business rules will be invoked using the Web Services in another application. Pre and Post validations will be there. Both validations will perform separately in other applications by calling our Service URL.

Responsibilities

- Developing the Web Service to support the functions by other applications created in the Rule & Lookup Manager.
- Enhancements to perform the business rules faster in background.

PROJECT #2		Description
Project Title	:	KomodoFCB BR Engine
