SUMMARY

Dedicated and highly skilled Senior Python Developer with **2 years** and **8 months** of experience in designing, implementing, and maintaining software solutions. Proficient in Python, SQL, Selenium, Web Scraping. Adept at leading development teams, solving complex problems, and delivering high-quality, efficient code. Seeking opportunities to contribute technical expertise and innovation to a dynamic organization.

EDUCATION

Yeswantrao Chavan College of Engineering, Nagpur (2016-2020)

Bachelor of Engineering (B.E.) in Mechanical Engineering Grade : 8/10

P.M.B.S, Nagpur, India (2016)

Maharashtra State Board of Secondary & Higher Secondary Education (MSBSHSE) Major: Mathematics, Physics, Chemistry and Computer Science Grade : 81 %

SKILLS

- Programming Languages: Python, SQL
- Database Management: MySQL
- Libraries and Frameworks: PyQt5, Selenium, BeautifulSoup, Pandas, NLTK, TensorFlow, Matplotlib
- Software Interface: RestAPI
- Web Development: Html, Django(Beginners level)
- Automation: RPA(Robotic Process Automation), Task Scheduler
- Version Control: Git, SVN
- Testing and QA: Selenium(Python, JAVA)
- Software Packages: MS Word, MS Excel, MS PowerPoint, Gitlab, Google Sheets
- Software Tools: Eclipse, VS Code, SublimeText

SOFT SKILLS

- Experience in handling customer incidents and strong customer focus in solutions.
- Strong Analytical and Problem Solving Ability and Data Management.
- Team Leadership and Collaboration
- Strong Communication and Documentation Skills

ACHIEVEMENTS

- Awarded for Outstanding Contribution in Delivery Excellence. Capgemini | Q-3 (July 22 - Sept 22)

LANGUAGES

- English, Hindi, Marathi

WORK EXPERIENCE

S&V CODING Pvt. Ltd., Delhi, India

Senior Python Developer (April'23-Present)

Business Unit : Development
Requirement: UI Development

- Led a team of 5 in designing and implementing **Python**-based solutions for end to end process development and maintenance of custom web scraping tools for gathering ticketing data from multiple online sources.
- Developed and maintained web scraping applications using **Selenium and BeautifulSoup**, extracting and parsing data from various websites, resulting in data accuracy, increasing speed and reducing time.
- Designed and maintained **PyQt5**-based desktop applications, delivering user-friendly interfaces and enhancing user experience.
- Collaborated with cross-functional teams to gather and analyze software requirements, ensuring the alignment of software solutions with business goals.
- Monitored and maintained scraping tools to adapt to changes in the structure of ticketing websites or to address issues with data quality.
- Researched and implemented data storage solutions on **MySQL** database, to organize and manage scraped ticketing data efficiently.
- Assisted in optimizing website and **API** performance through code improvements.
- Contributed to the design of user interfaces for ticketing data display and user interaction.
- Highly appreciated work with **delivery proven results**.

Capgemini Technology Services Pvt. Ltd. Bangalore, India.

Senior Data Analyst (March'21-March'23)

Business Unit : Research and Development
Client: AIRBUS & BOMBARDIER
Requirement: Process Development

- End to end solution delivered for Simplified Technical English(STE-Checker) tool using **AI/ML** packages in **Python**.
- The tool is capable of identifying errors in individual sentences as well as in large files.
- Libraries used **NLTK, GingerIt, TensorFlow, pandas**.
- End to end solution delivered for Callout Validation and verification tool.
- The tool is capable of identifying callouts present on illustration as well as text.
- Coordinated with client for improving quality of the tool.
- Accuracy of tool resulted in decreasing **90 %** of manual efforts and reduction in time by **95 %**.
- Highly efficient tool with accurate results.
- Automated desktop application using **RPA (Robotic Process Automation)** framework and worked on SubVersion for version control.

COURSES

- MOOC- Agile Software Development on Coursera. **Certificate**
- Automation, Coursera | July 2022 **Certificate**
- Exploratory Data Analysis for Machine Learning | Dec 2022 **Certificate**
- Beginner Deep Learning. Coursera | June 2021 **Certificate**

CERTIFICATIONS

- Data Mining and Machine Learning on Udemy(on going).
