

RESUME

Name: D. Infanta Glory

Email id: infantaglor@gmail.com

Mobile no: 9677107283

Career Objective

To work in a challenging environment while adapting to new technologies and effectively contribute to the growth of the organization with my knowledge and skill.

Technical Skills

Manual Testing:

- Excellent in generating Scenarios/Test Cases.
- Good knowledge about SDLC/STLC.
- Good knowledge about V-model and waterfall model.
- Involved in sanity testing in every build.
- Involved in smoke testing in every test cycle.
- Involved in re-testing and Regression testing.
- Test cases execution and analyse results.
- Good knowledge about Agile methodologies.
- Good knowledge on Test plan and Test case Design Techniques.
- Good knowledge about user Functional testing, Acceptance Testing, Unit Testing, System Testing, Integration Testing.
- Good knowledge about Non functional Testing and User Acceptance Testing.

Agile Methodologies:

- Worked on agile methodology.
- Involved in sprint planning.
- Involved in scrum meeting.
- Involved in sprint retrospective meeting.

SELENIUM(AUTOMATION):

- Expertise in selenium Web driver
- Have work on identifying Dynamic Elements using X path.
- Handling Web Elements.
- Knowledge about chrome Browser and Mozilla Firefox.
- Extensively involved in creating Test Scripts and Automated Test Cases.
- Good Knowledge about AUTOIT.

JAVA:

- Good Knowledge about OOPS.
- Good Knowledge about Abstraction.
- Good Knowledge about Encapsulation.
- Good Knowledge about Polymorphism.
- Good Knowledge about Constructors and Arrays.

TOOLS & SKILLS:

- Manual Testing Methodology
- Test case template
- Agile Methodology
- Jira
- Maven
- Framework
- Jenkins
- Eclipse IDE.
- TestNG
- Selenium Web Driver
- Github

- SQL
- Core Java

Academic Credentials

- Completed Bachelor Degree in Electronics and communication Engineering from Sri Venkateshwara Institute of Science and Technology, Thiruvallur with 70.4% in the year of May 2016.
- Completed Higher Secondary Education from St. Helen's Girls Higher Secondary School, St. Thomas Mount with 81.6% in the year of April 2012.
- Completed Secondary School Education from St. Helen's Girls Higher Secondary School, St. Thomas Mount with 83.8% in the year of April 2010.

Certification:

Completed Manual Testing and Automation Testing course from Qspiders Software Testing Institute.

Professional Summary

- 2.7 years of Experience in Software Testing in IT sector. [Manual Testing and Automation Testing]
- MAKO IT LAB – Role of Quality Analyst from Jan 2017 to May 2019
- Currently work in Monospear Technologies Pvt. Ltd in the Role of Senior Quality Analyst from Jan 2022

Project Details:

Project – 1

Project Name: ca.co.in

Description:

This project is developed as the next generation development platform for online banking. It is more of a technology migration rather than functional changes. Along with technology migration there are few functional benefits that will be brought to the countries online banking systems i.e. To standardize online banking functionalities & look and feel across countries (to the

extent possible) so the performance of online banking platform will be improved. Which might provide better customers experience as

well. To increase the number of customers signing up for online banking through the online channel, thus reducing the amount of paperwork in the branch and to improve user experience and strengthen the overall connection with the bank's online service leading to repeated use and stickiness

Role and Responsibilities: As a Software Testing Engineer, I was Involved in the following activities:

- Preparing and documenting the test conditions and test cases.
- Performed Manual Testing and created test cases including Functional Test cases, Integration Test Cases and System Test Cases.
- Performed testing for the application and reported the defects using QCtool.
- Responsible for Sanity, Re-testing and Regression testing.
- Validating changes made in DB (Backend) with Front End WebApplication
- Testing the application in real-time and working with Agile Methods
- Performed testing for the application and reported the defects using JIRA Tool
- Coordinating with the developers and QA to get the deliverable on track.

Project – 2:

Project Name: cd.co.in

Description:

The project purpose is testing the banking Application by using functional testing methods and report the issues in development

Description:

It is a web application which provides registered users to have more

secured banking possibilities and highly secured for transfer of funds from bank to within and other banks. Here major catch of application is user can operate moving to bank. The

user gets notifications and alerts of transfer of funds to registered mobile and mail address. In project we have provided multiple user options to use the account in protected control manner which is done by the primary card/ account holder.

Roles and responsibilities: As a Software Testing Engineer, I was involved in the following activities

- Performed manual Testing and created test cases including Functional, system and compatibility.
- Responsible for Sanity, Re-testing and Regression testing.
- Validating changes made in DB (Backend) with Front End Web Application
- Testing the application in real-time and working with Agile Methods
- Performed testing for the application and reported the defects using JIRA Tool
- Coordinating with the developers and QA to get the deliverable on track.

Personal Profile

Gender	-	Female
Husband's Name	-	C. Prakash
Nationality	-	Indian

I hereby declare that all the above details given by me are correct and true according to my knowledge and belief.

Place: Chennai

Yours Sincerely,
