

DHINESHKUMAR S

SUMMARY

Full stack software developer with extensive experience in complex web development and API development. I'm eager to advance my career by working for a firm that consists of motivated experts who value innovative problem-solving and make an effort to respond to inquiries. I'm looking for a challenging job at a company like Dream Version that will help me advance my knowledge, improve my developer skills, and advance the business.

SKILLS

- Front End (Angular, TypeScript, JavaScript, HTML, CSS, Bootstrap).
- Back End (C#, LINQ).
- Database Technology (SQL, MySQL).
- IDE (Visual Studio, Visual Studio Code, Git, TFS, DevOps, SQL Server Management Studio, MySQL Workbench)

EXPERIENCE

Caresoft Global private limited– Chennai, India

Junior Developer

10/2022 – current

Graduate Engineer Trainee

10/2021 – 10/2022

- I have contributed to the BMS (Benchmarking Management System) project, which has been in operation for last eight years.
- I have experience working with HTML, Angular, TypeScript, JavaScript, C# (LINQ), MySQL, and SQL.
- In the projects, I have implemented various technologies, such as PrimNG, NG-ZORRO for design.
- I have worked on user stories and tasks throughout the software development process, from design to API's and servers.
- I helped to transition from a code-first approach to a database-first approach.
- I worked on performance issues for writing stored procedures, functions, views, and triggers for server and improve the performances to decreasing the code.
- I have offered my assistance in infusing power into databases and servers.
- Designed stable, reliable and scalable databases for handling large-volume transactions using specialized tools and frameworks.
- Communicated technical and design requirements to determine performance, reliability and accessibility.
- I am acquainted with the ASP.NET Zero and ABP frameworks.
