Puducherry

Career Summary

- **AWS DevOps Engineer** Hands On experience in Linux, Git, Github, Ansible, Jenkins, Maven, SonarQube, Prometheus, Docker.
- Excellent skills in applying Continuous Integration and Continuous Delivery(CI and CD).
- Working Experience on **Git, Github, Jenkins**. Debugging issues if there is any failure in broken Jenkins build and maintaining Jenkins build pipeline.
- Managed **GitHub** repositories and permissions including branching and tagging.
- Expertise Knowledge in version control system in Git.
- Worked on **Jenkins** by installing configuring and maintaining for the purpose of continuous Integration and for End to End automation for all build and deployments.
- Used **Ansible** for configuration management.
- Strong experience on build tools and packaging the source code using maven.
- Working experience on **Docker** containerization tool and deployed various applications to various environments.
- Having basic Knowledge of **Python technologies**.
- Good knowledge on Linux Administration.
- Having Good experience in **Amazon Web Services** environment and good knowledge of AWS services like Elastic Compute Cloud (EC2), Elastic Load Balancers, IAM, S3, Cloud Front, RDS, VPC, Route53, SNS, Cloud watch, Cloud Formation, Cloud trail.
- Utilized Cloud Watch to monitor resources such as EC2, CPU memory, EBS volumes; to set alarms for notification or automated actions; and to monitor logs for a better understanding and operation of the system.
- Implementation of **NAT** gateways for web apps hosted in private subnets.
- Created **Alarms** and notifications for EC2 instances using **Cloud Watch**.
- Creating **S3** buckets and also managing policies for S3 buckets and Utilized S3 bucket and Glacier for storage and backup on AWS.
- Attaching or Detaching EBS volume to AWS EC2 instance.
- Created **SNS** topic and added Mail subscription to notify the status of instance.
- Designing and Deploying Highly scalable infrastructure using ELB and Auto Scaling services.
- Ability to learn new skills quickly.

Skill Set

Cloud Technologies : AWS(Amazon Web Service) EC2, S3, VPC, ELB, IAM, RDS, SNS, CLOUDWATCH.
DevOps Technologies : Git, Github, Jenkins, Maven, Ansible, Docker, Saltstack, Prometheus, Splunk, Terraform.
OS Platform : Linux, windows.

Work Exposure

Payroll Company : NCR Corporation
Designation : Order Fulfillment Specialist
Duration : 17 Dec 2020 to Till Date
Experience : 1+ years

Payroll Company : TmmT Tech.
Designation : Support Engineer Analyst
Duration : 23 Apr 2019 to 15 Dec 2020
Experience : 1+ years

Payroll Company : Air India Ltd
Designation : Operation Executive
Duration : 12 Apr 2018 to 22 Apr 2019
Experience : 1 year

Payroll Company : Parveen Travels Pvt Ltd
Designation : Assistant Business Dev
Duration : 23 Aug 2015 to 10 Apr 2018
Experience : 2+ years

Professional Experience

Roles & Responsibilities:

- Create and maintain fully automated CI/CD pipelines for code deployment.
- Maintaining the source code in **GIT** for various applications.
- Responsible for creating the branches and tagging the code.
- Used **Ansible** for Configuration Management.
- Automated the continuous integration and continuous deployments by using **Jenkins**.
- Responsible for the Plug-in Management, User Management, Build/Deploy Pipeline Setup and End- End Job Setup of all the projects.
- Installed **Jenkins** on a Linux machine and created a **master** and **slave** configuration to implement multiple parallel builds through a build farm.
- Containerizing applications with **Docker**. Experience knowledge on creating custom Docker Images using **Docker file**.

- Works on AWS Services but Mainly Concentrated on **EC2 (ELB, AUTO SCALING, EBS), VPC, RDS, S3, SNS, CLOUDWATCH, IAM.**
- Setup/Managing **VPC**, Subnets, make connection between different zones blocking suspicious ip/subnet via **ACL**.
- Setup/Managing CDN on Amazon Cloud Front to improve site performance.
- Utilized Cloud Watch to **monitor** resources such as **EC2, CPU memory, EBS volumes**; to set **alarms** for notification or automated actions; and to monitor logs for a better understanding and operation of the system.

Project Handled As Build and Release Engineer

Project#1

Client	Greens Technologies
Role	DevOps Engineer
Environment	Linux, Git, Github, Maven, Jenkins, Ansible, SonarQube, Splunk, Tomcat, AWS

Roles & Responsibilities:

- Installing and configuring GIT, Jenkins, Deployment and automation.
- Maintaining the source code in GIT for various applications.
- Developed and implemented Software Release Management strategies for various applications according to the agile process.
- Administered merge, build and deployment of the codes to all the environments.
- Responsible for creating the branches and tagging the code.
- Defined branching and merging strategies on Github.
- Coordinate or assist the developers with establishing and applying appropriate branching, merging conventions by using Github.
- Used Ansible for configuration management.
- Identify root cause, and resolve problems.
- To configure and maintain codebase to support the build and deployment of code on servers.
- Splunk is used to monitor the log files in server.
- Jenkins is used as a Continuous Integration tool for automation of daily process.

- Involved in the release process and deployed applications (WAR and JAR) to the Tomcat.

Project#2

Client	Greens Technologies
Role	DevOps Engineer
Environment	Linux, Git, Jenkins, Maven, Ansible, SonarQube, Terraform, Docker, Tomcat, AWS

Roles & Responsibilities:

- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux/ Ubuntu) and Configuring launched instances with respect to specific applications.
- Installed application on AWS EC2 instances and also configured the storage on S3 buckets.
- Implemented AWS high-availability using AWS Elastic Load Balancing (ELB), which performed balance across instances in multiple availability zones.
- Utilizing Jenkins for enterprise scale infrastructure configuration and application deployments checking out the code from Github and use Maven to build jar and war artifacts.
- Responsible to build the tools and packaging the source code using Maven.
- Authenticate and Authorize users on Jenkins as per their responsibilities.
- Responsible for Jenkins plugin management, user management, Build/Deploy Pipeline Setup, and End-End Job Setup of all the projects.
- Deployed application packages on to docker containers. Coordinated with software development teams and QA teams for smoother execution of the processes.
- AWS infrastructure is built by using Terraform scripts.
- Performed regular builds and deployment of the packages for testing in different environments (Dev, QA, and UAT).
- Communicating requirements effectively to team members and manage applicat

Education

Graduation : B.E (Aero) from Sathyabama University
with 6.64 CGPA in 2015.
HSC : From T.N Board with 70% in 2009.
SSLC : From T.N Board with 72% in 2011.

Personal details

Father's Name : Alaudeen
DOB : 4th Jan 1993
Nationality : Indian
Languages known : Tamil & English

Declaration

I hereby declare that all the above furnished information is true to the best of my knowledge

Place : Puducherry
