

HARI HARA SUDHAN

SOFTWARE TEST ENGINEER

REACH OUT

+91-7358872239

sudhanharihara046@gmail.com

CAREER-ORIENTED

Eager to take on challenging assignments in the field of testing and automation and to continuously develop my skills and knowledge in order to deliver high-quality software products. Aspiring for high career growth and determined to be an asset for the organization through my expertise in test automation and the creation of customized reports

SKILLS AND ABILITIES

- Java
- UI Automation, API automation
- Postman, Rest Assured
- Mobile Testing
- Selenium WebDriver
- Cucumber BDD, TestNG, Junit, POM, Data Driven
- JIRA
- Eclipse, IntelliJ
- Maven
- Jenkins
- MySQL
- Agile-Scrum

QUALIFICATION

B.Tech/B.E

St.Joseph's College of Engineering and Technology

Anna University

PROFILE SNAPSHOT

- Having **4.8 Years** of Experience in Software Testing in that both **Manual** and **Automation**.
- Experience in automation frameworks, including **Cucumber BDD**, **TestNG**, **JUnit**, **POM**, and **Data-Driven Framework**.
- Strong experience in API Testing using **Postman & Rest Assured**.
- In-depth knowledge of **RESTful APIs**, along with various testing methodologies and tools.
- Strong expertise in automating web application testing using **Selenium WebDriver**.
- Experience in creating Test Plan document.
- Proficiency in writing test cases using Element locators, **WebDriver** methods, **Java** programming, and **TestNG** Annotations.
- Experience in reporting defects using **JIRA**, ensuring proper documentation and tracking throughout the development lifecycle.
- Well-versed with **Agile Scrum**, facilitating iterative and collaborative development and testing.
- Experience in using **Git** and **GitHub**, ensuring version control and efficient collaboration with the development team.
- Expertise in implementing Data-Driven Testing Framework, using Apache POI to read and write data in Excel.
- Proficient in automating web application testing using **Selenium WebDriver**, covering various scenarios and cross-browser testing.
- Worked with **Apache** POI Library to read data from external source.

EMPLOYMENT

- Worked as a Software Test Engineer at **GlobalLogic India Pvt Ltd.** (Mar 2022 - Jan 2023)
- Software Test Engineer at I-Weave Solutions Private Limited, Bangalore (May 2018 - Feb 2022)

PROJECT DETAILS

GLOBAL LOGIC	E-COMMERCE	MAR 2022 - JAN 2023
ABSOLUTE WEB		

Absolute Web is a leading digital agency specializing in web design, development, and digital marketing solutions. Third party integrated Web Application. Creating visually stunning websites to developing robust e-commerce platforms and implementing effective digital marketing strategies, we offer end-to-end services to meet our clients' unique needs.

Contributions

- Worked on Automation Framework implementation using Page objects, Data Driven, Maven, Selenium Web Driver – Java and Cucumber.
- Prepare the automation script in selenium web driver using cucumber
- Developed BDD tests using Cucumber by writing behaviors and step definitions
- Developed required Selenium support code in JAVA for Cucumber
- Expertise in developing automation scripts in BDD format using cucumber and
- Proficient in writing cucumber scenarios in GHERKIN format
- Created & Maintained Automation Selenium Automation Scripts for the Scrum Stories
- Developing new scripts, debugging and reviewing the automation test scripts.
- Responsible for preparing test scenarios.
- Preparing the XPATH and handling Dynamic Elements.
- To Write Scripts in Data-driven with Junit.
- Validate the response, response time, error code.
- Well know to use OAuth and OAuth2 authentication mechanisms.
- Participating in all the agile ceremonies –Sprint Planning, Sprint grooming, daily scrum calls, Sprint review, and Sprint retrospective.

I-Weave Solutions Private Limited	INSURANCE	OCT 2020 - FEB 2022
123 MONEY		

123 Money Ltd, trading is an Irish insurance company. The offers a range of insurance products and services to customers. The company's product portfolio includes car insurance, home insurance, travel insurance, life insurance, pet insurance, and business insurance.

Contributions

- Proficiently implemented Selenium Web Driver to automate scripts for Cross Browser Testing within the TestNG framework.
- Applied the Page Object Model to enhance automation frameworks using Selenium, ensuring maintainability and scalability.
- Developed and managed Selenium Automation Scripts for a highly transactional web application, utilizing the robust combination of Selenium Web Driver and TestNG.
- Implemented custom TestNG listeners for re-running failed test cases and capturing screenshots of any failures, enhancing the overall robustness of the automation suite.

- Utilized Maven to organize and generate packages, while leveraging Java language and the JUnit framework for scripting. Contributed to Regression and Functional testing using Selenium Web Driver, effectively identifying and addressing issues.
- Thrived in an AGILE environment, actively participating in scrum and sprint meetings. Maintained open communication with Functional Analysts to seek clarifications and provide updates on any arising issues.
- Developed test scripts using the Eclipse IDE and TestNG framework, ensuring a streamlined and efficient scripting process. Executed test scripts, meticulously analyzed reports, and promptly addressed any identified issues.
- Emphasized on generating comprehensive reports and employed TestNG for thorough analysis, ensuring a data-driven approach towards quality assurance.

I-Weave Solutions Private Limited

NANTHEALTH

HEALTHCARE

MAY 2018 - SEPT 2020

NantHealth, Inc. is a healthcare technology company that provides software solutions to the healthcare industry. NantHealth focuses on developing innovative products and services that aim to improve healthcare delivery and outcomes. It helps to simplify tasks such as claims processing, eligibility verification, and referral management, ultimately improving efficiency and reducing costs for both providers and payers.

Contributions

- Be an active participant in sprint planning, sharing insights and providing input on the testing effort required for each user story.
- During daily stand-ups, update the team on your progress, any challenges you're facing, and if you require any support from other team members.
- Use Postman to send HTTP requests to API endpoints and verify the correctness of responses.
- Test API error handling by sending invalid requests and verifying the responses.
- Verify that appropriate error codes and error messages are returned when expected.
- Work closely with the product owner to prioritize backlog items, ensuring that testing efforts are aligned with the highest-priority features.
- Use effective communication and problem-solving techniques to guide the team toward solutions.
- Maintain well-organized and up-to-date documentation for requirements, test plans, and user stories.
- Customize JIRA workflows, issue types, and dashboards to match your team's specific needs and processes.

API Integration Testing

- Collaborate with other teams to test API integrations with third-party services or microservices.
- Validate the data exchange and communication between different APIs.

Error Handling and Negative Testing

- Test API error handling by sending invalid requests and verifying the responses.
- Verify that appropriate error codes and error messages are returned when expected.
