EXPERIENCE

Microsoft Security Operations Engineer

DXC Technology Mar 2021 - Present

- Incident Response: Identify potential security incidents through monitoring and reporting all incidents.
- Assess identified incidents to determine the appropriate next steps for mitigating the risk. Respond to the incident by containing, investigating, and resolving it
- Identity and Access Management - (Azure Active Directory – AAD)
- Threat Protection - (Advanced Threat Analytics, Windows Defender Advanced Threat Protection, Office 365 • Threat Protection and Threat Intelligence), Information Protection - (Azure Information Protection, Office 365 Data Loss Prevention, Microsoft Cloud App
- Security, Office 365 Advanced Security Management, Microsoft Intune) Security Management - (Azure Security Centre, Office 365 Security and Compliance Centre, Windows Defender Advanced Security Centre).
- Experience with Azure AD Connect, including configuration of sync scopes, hybrid Azure AD join, group writeback, password writeback and password synchronization models
- Hands on experience with executing bulk operations against the Microsoft cloud using PowerShell scripting
- Endpoint Security with Windows Process Checking, Protected Workspace and Firewalls
- Good verbal and written communication skills, including ticket documentation, incident reporting and escalations
- Knowledge of network devices, firewalls, IDS/IPS, TCP/IP protocols, and general network architecture
- Strong technical understanding of network fundamentals and common Internet protocols, specifically DNS, HTTP, HTTPS / TLS, and SMTP
- A good knowledge of various security technologies such as SIEM (Sentinel), Email Analysis, Malware analysis, network (routers and Switches) and application firewalls (WAF), host intrusion prevention, EDR (next Gen anti-virus) and anti-virus
- Responsible for Monitoring, Fine tuning, reviewing & maintenance of cyber security tools and SIEM tool - Azure Sentinel, EDR – Microsoft EDR tools, Email Security- Abnormal security, Azure Security Center.
- Event Source Management & Log collection
- Troubleshoot Log collector / event source issues and alerts

- Worked in SOC 24/7 team.

Technical Solutions Consultant

Hewlett Packard Enterprise *Dec 2018 - Feb 2021*

- Good communication skills with the ability to use it effectively and persuasively and be able to respond professionally to customers' queries.
- Providing Level 1 Generalist Enterprise technical support to HPE Customers for Network products
- Excellent written and verbal communication skills, with an ability to empathize with customers with varying levels of technical ability.
- Handling escalation calls / emails of clients to provide the Service Delivery per SLA, engaging relevant TAM, ASM and AGM when required for priorities tickets/ cases.
- Escalating tickets to the regional ASM's or TAM's based on scope of support and based on escalation matrix to avoid any SLA breach.
- Excellent organizational and interpersonal skills.
- Proved successful working within tight deadlines and fast-paced atmosphere.
- Worked flexible hours, night, weekend, and holiday shifts.
- Created plans and communicated deadlines to ensure projects were completed on time. Demonstrated respect, friendliness, and willingness to help wherever needed.
- Conducted research, gathered information from multiple sources and presented results.
- Identified issues, analyzed information, and provided solutions to problems.
- Drove operational improvements which resulted in savings and improved profit margins.
