EDUCATION

S.A.Engineering College

Bachelor of Information Technology

Tamilnadu, Chennai

Aug 2019 – May 2023

- Cumulative GPA : **8.6/10.0**

- Relevant Coursework: Asp.Net , SqlServer , Angularjs , Html , Css , Problem Solving , Probability , Algorithms

Pathipaga Chemmal K Ganapathy Higher Sec School

Higher Secondary in Computer Science

Tamilnadu, Chennai

June 2018 – Mar 2019

- Cumulative Mark : **66 percent.**

Pathipaga Chemmal K Ganapathy Higher Sec School

SSLC

Tamilnadu, Chennai

June 2016 – Mar 2017

- Cumulative Mark : **91.2 percent.**

WORK EXPERIENCE

FullStack Developer,Intern

Aspire Systems

Sep 2022 - Present

Tamilnadu, Chennai

- Worked on creating an end-to-end project CarRental App using Angular and Asp.Net
- Worked on creating an end-to-end project on PayrollmanagementySystem using Asp.Net.Mvc
- Knowledge in Github to push and pull the datas.
- Worked on creating an JwtTokenBasedAuthentication , RoleBasedAuthentication using WebApi

TECHNICAL SKILLS

- **Back End Technologies:** Asp.Net , SqlServer , Basic in Java , WebApi
- **Front End Technologies:** Angular , Html , Css
- **Tools:** Swagger , GitHub , Postman
- **SoftSkill:** ProblemSolving , Communication , Easily adopt Environment , Lead a team , Follow instructions, and Get a job done on time.

PROJECTS

Payroll Management System using Asp.Net.Mvc

| *Project Work*

- Developed an **RoleBasedAuthentication** to give access to admin and user.
- **Entity Framework** for creating migration then database will create.
- Project helps to **Manage the payment by Role of the employee.**
- Login Page with validation(for both server side and client side) using **Form Authentication to identify user and give authorize to the user** , I used all the CRUD operation in this project with **Entity framework**,then used searching for filtering the employees and use filter like **Action filter for tracking the user activity** and **Exception filter for handling the error** and Global Exception for handling all the exception which are all occur in development mode

Car Rental Application using Angular with WebApi

| *Current Project Work*

- Developed on **JwtTokenBasedAuthentication** to give access to admin and user.
- Completed a Full stack Angular Application using Angular has **FrontEnd** and **WebApi(Asp.Net with Code first Approach)** has **BackEnd** with features like **Offer Timeout for certain period of time** and **Availablity checking of the vechicles.**
- Developed **Angular Application** using WebApi with **Code First Approach.** and used Sql Server has Backend Database.

DECLARATION

- I hereby confirm that the information given above is true to the best of my knowledge. **Karthick B (Chennai)**
