Technical Skill

- T-SQL
- Oracle
- Python
- Dot Net
- Tableau
- Power Bi
- Win automation tool

Soft Skill

- Data Analysis and Data Visualization
- Problem Solving
- Teamwork
- Leadership
- Time Management
- Decision making
- Multi-tasking

Education Background

- Bachelors of Engineering (Electronics and Communication Engineering) – PSR Rengasamy College of Engineering for Women, Sivakasi (76.5% – Apr 2014)
- H.S.S – Devangar Girls Higher Sec School, Aruppukottai (78.75% – Mar 2010)
- SSLC – Government Girls Higher Sec School, Muthuramalingapuram (89.6% – Mar 2008)

Summary

Experienced software developer with 5 years of experience in managing databases, crafting intricate queries and optimizing databases performance. Proficient in developing web application, including creating custom modules and expertly tackling technical challenges to ensure the seamless operation of software.

Professional Experience

Amitysoft Technologies Pvt Ltd Feb'2020 – Till date

Designation : Software Developer

Platform : Microsoft SQL Server and Ramco Systems Applications

Technologies used – SQL, Python

Roles and responsibilities:

- Worked closely with functional team to ensure proper design and implementation of database systems.
- Created Front end and Back End Design based on business requirements and functional system design.
- Collaborated with cross functional teams and clients to understand the business requirements.
- Contributed to the design and development of database systems for the UAT server, ensuring efficient data storage and retrieval.
- Involved in updating procedures, functions, triggers and packages based on the change request of customer and Unit Testing for the same.
- Utilized joins and sub queries to simplify complex queries involving multiple tables while optimizing procedures and triggers to be used in the production.
- Wrote SQL queries to obtain data from multiple tables to spool into CSV format and provide extracts to business and users.
- Monitored and Troubleshoot SQL Server Performance using Query Blocking and Deadlocking Issues.
- Provide database coding to support business applications using T-SQL.
- Develop & maintain project timelines and facilitate the day-to-day operational aspects of a project and scope.
- Provided production support through monitoring, maintaining and Job Service management for Email Job Trigger.
- Responsible for resolving any Data issues reported by the business users and delivering all enhancements as required by business users.
- Analyze & translate functional specifications & change requests into technical specifications.
- Designed and developed reports and dashboards using the Power BI platform.
- Managing and resolving end user issues/facilitating application incident resolution with offshore team.
- Managing and providing support for data solutions in business-as-usual (BAU) scenarios.
- Implementation and customization of Odoo ERP solutions using Python for clients in a range of industries, including manufacturing, retail, and e-commerce.
- Designing and developing new features for existing applications in Odoo ERP using SQL and Python.
- Developing and customizing Odoo modules to address specific business needs, resulting in improved efficiency and productivity for the "rebuERP" project.

Certificate Course

Python :

Project - The project done on hotel booking systems provides details of all information related to bookings and room availability. It's main purpose is to reduce manual labor and provide searching facilities based on various factors such as customer details and payments.

Power Bi :

Project - Developed Dashboard projects by using SQL queries for Eg: 120 years of Olympics details, HR management systems and Import live data with SQL queries.

Tableau:

Project - Developed HR analytics Dashboard project by using SQL queries.

Dot Net

Oracle SQL

Master's in Data science from Besant Technologies

Amazon Web Service(AWS)

TRIYAM LLC : Jul'2019 - Dec'2019

Designation : ETL developer - Healthcare Data Migration / Archival
Platform : RPA (WinAutomation)

Roles and Responsibilities:

- All projects focus on automating the manual process of creating and extracting Health.
- Uploading the extracted Patient documents and testing the same in Database whether all the
- documents are successfully uploaded.
- Preparing Status reports on extracted documents and send it to the Customer.
- Extracted data from different sources and exported to SQL server database.
