Objective:

Energetic Software Developer seeking a challenging position to utilize my extensive experience in Designing, Implementing, and Integrating software applications, and to further enhance problem-solving skills to achieve career growth.

Skills and Experience Summary

- Having 1.4 years of experience in the Information Technology industry with strong analytical, technical, and problem-solving skills.
- Developed PL/SQL programs with Packages, Procedures, Functions, Triggers, Collections, Bulk Collect, FORALL, ref Cursors, Dynamic SQL.
- I have experience in Database objects, Indexes, and Table Partitions, Global Temporary tables, External tables, Materialized view, and Performance Tuning.
- Involved in Requirements Gathering, Design, Development, Implementation, Acceptance Testing and Bug fixing for end-to-end IT solution offerings across various development, maintenance.
- Knowledge in Client-Server application development using Oracle 11g/12c, PL/SQL, SQL*PLUS
- Knowledge in Loading Data into Oracle Tables using SQL*Loader.
- Proficient in creation, modification, and effective use of database objects like Tables, Constraints, and Indexes.
- Experience in Agile /scrum development methodology.
- Analyze the functional and technical specifications and convert to PL/SQL programs and modify existing PL/SQL packages. Knowledge of advanced PL/SQL concepts.
- Worked extensively on cursors and ref cursor Exception handling.
- Ability to work on complex technical assignments and ensure timely deliveries.
- Good Knowledge using PRAGMA AUTONOMOUS_TRANSACTION
- Knowledge in handling errors using Exceptions.

Technical skills

- Experienced in Oracle PL/SQL development.
- I have good knowledge of Unix.

Experience Summary

- Working as a Software Engineer in SRG Systems Pvt Ltd, Bangalore from 2022 Aug to Till Date.

Education

- B.E (Electrical Engineering With 8.1 CGPA) from S.K.R Engineering College (June 2018 – May 2022).

Operating Systems	UNIX, Windows
Languages/DB	Oracle SQL, PL/SQL, Oracle 11g, 12c, 19c

Project Details

Project-1	Merchant Manager
Customer	Merchant Manager
Period	Aug 2022 to Till Date
Position	Software Engineer
Responsibilities	• Developed PL/SQL programs with packages, procedures, functions, Ref cursor, Bulk collect, Views, Global temporary tables, Dynamic SQL, Index, Sequence, Triggers. • Written SQL queries to get customer expected results. • Written back-end procedures and packages to fulfill project requirement. • Debugging procedures and packages to resolve issues as part of supporting Project. • I have prepared Releasing documents when releasing build for project enhancement. • Written SRS (System requirement specification) and TRS (Technical requirement specification) documents for customization of Project • Interacted with Client to project requirement. • Created some user defined functions. • Used debugger to test the data flow and fix the mapping. Involved in full development cycle of Planning, Analysis, Design, Development, Testing, and Implementation. Analyze and Troubleshoot performance issues in the Reporting Application and underlying SQLs. • Gather, document, and convert functional reporting requirements into technical solutions. Develop thorough understanding of data models, underlying data, and business uses to ensure reports meet client needs. • Interacted with Client to project requirement. • Created some user defined functions. • Used debugger to test the data flow and fix the mapping.
Solution Environment	Oracle 12c, PL/SQL, SQL, Putty
