PROJECT	
Title	Knob - Local Sharing Economy
Client	US Client- Seattle, LLC
Technology	XCODE 10, Swift 4, URL Session, Google Map Integration, Push Notification, Core Data, Normal and Group Chat & third party library cocoa pods and etc ..
Role	Senior IOS Developer
Responsibilities	- Worked from END to END features of Application. - To deliver libraries to multiple teams so that they consume the components in Agile Methodology. - Involved in Bug Fixing and Updating New Features - Uploaded App in App Store via iTunes connect
Description	- Knob's community-created messaging channels connect people in local areas so they can help each other get things done. - Example: if you're giving away free items after Spring cleaning, broadcast your items on the "free" channel to see if your neighbors are interested in them. - On the other hand, if you want to listen to free-item broadcasts, just add "free" to your channel list and wait for broadcasts to come in from people around you. The channels you can create and broadcast on are up to you and the people in your local area! We've added two default channels to get the conversation going: "free" and "public square" - use these channels as you wish.
