

CAREER OBJECTIVE

To get exposure in the challenging work environment in a renowned organization having ample scope for self-improvement and contribute to the organization to the maximum possible extent

PROFESSIONAL OVERVIEW :

- Having overall 5 years of Experience in Software testing (**Manual**) and having knowledge in **Selenium& Automation Testing**.
- Experience in **testing Web applications**.
- Experience in **preparing potential test cases and logging defects** in JIRA tool.
- Good experience in **creating, modifying and selenium automation scripts**.
- Posting the issues in **Defect Tracking tools (JIRA)** with proper Priority.
- Good experience in **Sanity, Smoke, Functional, UI, SIT, Compatibility and Regression Testing**.
- Good understanding of **SDLC, STLC, Bug Life Cycle, Traceability Matrix**.
- Involving in giving daily and weekly status report to team members.
- Worked on Test management /Defect Tracking tool Jira.
- Experience on Writing the Scripts using **Selenium WebDriver, Test Ng, Core Java**.
- Good Experience in **SQL to Retrieve the Data**
- Good knowledge on web services tools **Post Man and Rest API** and understanding of **HTTP code responses**
- Parse the response **JSON** and **validated the DATA** using **JAVA**.
- Created and maintained automated test script for **API testing using JAVA/TestNG**.
- Update the framework with helper methods if any while developing **REST API automation scripts**.

WORK EXPERIENC

- Working as Associate Testing Engineer in **WIPRO LTD** Outworx (payroll) from Dec 2022 to Feb 2024.
- Worked as Associate Testing Engineer in **MSC Technology India PVT.LTD** from Dec 2019 to Sep 2022.
- Worked as Software Testing Engineer in **CMA CGM Shared Service Center India PVT.LTD** from Jan 2018 to Aug 2019.

TECHNICAL SKILLS

- | | |
|-------------------------|---|
| • Software Testing | : Selenium Automation, Manual |
| • Programming Language | : Java |
| • Unit testing tools | : TestNG, Junit |
| • Version Tracking Tool | : Git |
| • Test Management Tools | : JIRA |
| • Automation | : Functional UI/API |
| • API | : Postman (Manual), Rest Assured (Automation) |

QUALIFICATION:

- **B.com(I.S.M)** - Dharmamurthi Rao Bhahadur Calavala Cunnan Chetty's Hindu college (2017)-65%
- **H.S.C** – S.S.V.V Matriculation (2014)-61%
- **SSC** - Don Bosco Matriculation (2012)-67 %

PROJECT DETAILS:

#Project -1 DHL Logistics:

DHL Global Forwarding, Freight (DGFF) needs to improve its finance and logistics processes across its five Global Service Centers (GSC). Its goal is to create a global process automation hub to remove internal process bottlenecks and position the entire organization to continue to provide top-notch service. Its solution is a classical Human Delivery Center structure complemented by a Virtual Delivery Center

Roles & Responsibilities

- Understand the business requirements provided by clients.
- Responsible for preparing effort estimates and creating subtasks in JIRA and presenting in sprint planning.
- Responsible for developing test plan, test scenarios and test cases for each sprint.
- Test Automation using Selenium Web driver Cucumber Framework
- Responsible for all execution activities such as Cross browser, Mobile, Postman-API, Rest Assured, Smoke and Regression testing.
- Defect analysis, Defect Reporting and Daily tracking and presenting defects to clients in daily stand-upcall.
- Effectively interacted with clients on updating test status and test cases.
- Modifying existing scenarios and developed on according to our new changes.
- Responsible for performing execution once new code is deployed to QA and UAT environment.
- Responsible for performing Database Testing in MySQL with DML commands

#Project -2

Ecuador Exports and Imports

To manifesting bill of lading, Generating / creating various reports for Agencies and make sure to achieve the Service Level Agreement as agreed with agencies. Communicate with the agency for updates, Escalations and clarifications. Handling Documentation related queries from both customer & Agencies. Communicate with agency and customer to get missing details of complete the shipment.

Roles & Responsibilities

- Understanding and Analyzing the Application under Test in terms of Object Identification.
- Test Automation using Selenium Web driver Cucumber Framework.
- Creating Test scenarios and Collecting Test Data.
- Identifying end to end scenarios and code modularity.
- Creating reusable components.
- Responsible for identifying Regression test cases and converting test case to test script using Selenium WebDriver.
- Actively involved in writing and maintenance of test scripts and to run test cases on various browsers under Data driven framework using Page Object model, TestNG and Apache POI.
- Utilize ID, X-path and other locators to locate elements on Webpages for the Application under test.
- Creating and enhancing Test Cases (Test Scripts) using Element locators, WebDriver methods, Java programming concepts.

#Project -3

Vietnam Exports and Imports

To manifesting bill of lading, Generating / creating various reports for Agencies and make sure to achieve the Service Level Agreement as agreed with agencies. Communicate with the agency for updates, Escalations and clarifications. Handling Documentation related queries from both customer & Agencies. Communicate with agency and customer to get missing details of complete the shipment.

Roles & Responsibilities

- Understanding and Analyzing the Application under Test in terms of Object Identification.
- Test Automation using Selenium Web driver Cucumber Framework.
- Creating Test scenarios and Collecting Test Data.
- Identifying end to end scenarios and code modularity.
- Creating reusable components.
- Responsible for identifying Regression test cases and converting test case to test script using Selenium WebDriver.
- Actively involved in writing and maintenance of test scripts and to run test cases on various browsers under Data driven framework using Page Object model, TestNG and Apache POI.
- Utilize ID, X-path and other locators to locate elements on Webpages for the Application under test.
- Creating and enhancing Test Cases (Test Scripts) using Element locators, WebDriver methods, Java programming concepts.

PERSONAL DETAILS:

- Name : J.Raguvaran
- Date of Birth : 26-09-1995
- Sex : Male
- Nationality : Indian
- Marital status : Married
- Languages Known : Tamil, English

DECLARATION

I hereby declare that all the information provided is true to the best of my knowledge.

Place: Chennai

Date:

(RAGUVARAN J)
