PROFESSIONAL EXPERIENCE

IT MANAGER | Amazon India, Bangalore

JUN 2016 - PRESENT

- Managing the team of 22 Support Engineers across South region and ensuring the support excellence to the Fulfillment Centers, Delivery Stations, Sort Center & Ultra Fresh Center IT infrastructure operations.
- Achieved the annual cost savings of \$1.8 million for organization by incorporating the new service in replacement of existing service by exploring the AWS services.
- Driven the virtual support initiative for Amazon India Field IT and supported for 30% of customer-initiated tickets without involving the onsite support. Apart, achieved the ticket goals of SLA 98%, Quality 100% & CSAT 99% through this support model.
- Led the network project for South region and migrated the existing infrastructure (BEN stack) to new infrastructure (GB stack) for 42 delivery centers within 3 months by collaborating with multiple stakeholders (LVC, network delivery, Build leads and facilities) and business operations.
- Driven the operational excellence program for improving the CSAT response rate and achieved 20% response rate (from 14%) by creating the awareness, campaigns across customers with the support of field team.
- As part of people performance & development, have mentored four senior engineers to support transforming them into managerial role. Promoted three engineers from L3 to L4 and led the development plan for eight engineers to support their career growth.
- Completed the training of "Making Great Hiring Decisions". Participated in 80+ hiring events & interviews and hired 24 candidates for Amazon.
- Act as a Bar Raiser (reviewer) for planned/emergent changes which impact infrastructure services, and ensuring the risks, rollbacks, authorization, SOPs are assessed properly as to avoid the impact for customers.
- Acts as an escalation point for the team for incidents, problems, changes and IT service continuity.
- Managing IT strategy, roadmaps, service level management, engineering excellence, processes, standards, governance, enabling technology, projects and program delivery.
- Leading and building the teams, creating a positive work environment by developing new opportunities, successful delivery of engagements, monitoring of organizational health and driving of thought leadership.

TECHNICAL SUPPORT ENGINEER | Getronics Solutions Pvt Ltd, Bangalore

JUN 2015 - MAY 2016

- Leading the Levi Strauss (Client) and provided Remote IT & Network Support across India, Bangladesh & Srilanka.
- Windows 7 rolled out on 250+ machines within 2 months.
- New Corp office built and Warehouse had shifted without any production impact.

CUSTOMER SUPPORT ENGINEER | HCL Services India Pvt Ltd, Bangalore

JUL 2011 - MAY 2015

- Installing and configuring the Windows & MAC Operating System.
- Managing user permissions in Active Directory (Password Reset, Unlock, Add Host).
- OS & Patch deployment via SCCM 2012 Configuration Manager.
- Firmware/iOS upgradation on network devices and making VLAN changes in switches.
- Troubleshooting and auditing the Wireless Access Points (Cisco & Mist AP's).
- Network installation, Operations and troubleshooting of Cisco Switches & Routers.
- Configuring and providing access for network printer and shared drives.
- Monitoring and troubleshooting the MPLS, ILL links. Coordination with IT vendors, ISP & PRI for service escalations & restoration supports.
