• [linkedin.com/in/vv-sharma/](https://www.linkedin.com/in/vv-sharma/)

Front-End Developer with 3 years of professional experience in User Interface Development across the tech stack: HTML, CSS, Bootstrap, JavaScript, React, Redux, and Typescript.

### SKILLS

---

**Languages:** HTML5, CSS3 (Sass, Less), JavaScript (ES6+), TypeScript.

**Frameworks/Libraries/State Management:** React.js, Angular, Redux.

**Responsive Design:** Bootstrap, Media Queries, Flexbox, CSS Grid.

**Build Tools:** Webpack, Babel, npm/yarn.

**Version Control & Performance Optimization:** Git, Bitbucket, Lazy Loading, Code Splitting, Minification.

### WORK EXPERIENCE

---

#### Eleviant CTG, Coimbatore - Senior Engineer - Software Development

10/2021 – Present

*An IT Firm providing service, consulting, and products.*

**Project:** Modern Intranet Solution

#### Roles and Responsibilities:

- Collaborated with product managers to understand and define product requirements by participating in product planning sessions and providing technical insights and feasibility assessments.
- Gathered requirement analysis and created a POC to understand the objectives of the project outcome.
- Developed and maintained a social intranet application using HTML, CSS, JavaScript, and modern front-end frameworks and libraries, including React.js and Redux, to create interactive and dynamic User Interfaces.
- Integrated the Open AI with the social intranet application that helps the user to post the contents as in their thoughts.
- Developed a recognition awards application within an organization, which can be a valuable initiative to acknowledge and reward employees for their contributions using HTML, CSS, and libraries, including React and Redux.
- Developed and maintained a website that would help managers and employees efficiently manage timesheet operations for billable purposes with minimal manual interruption as a part of a 2-person team.
- Utilized TypeScript to enhance code quality and provide better development-time tooling.
- Integrated RESTful APIs to retrieve and display dynamic data, improving overall application functionality.
- Conducted routine updates, security patches, and others website maintenance tasks like Web Performance Monitoring and User Experience Optimization.

### Achievements:

- Used React in the application that improves responsiveness because it loads as a single-page application and reduces the load time.
- Used Redux for state management helps to maintain the data throughout the application without repeated API calls and helps to update and reflect the data into the live site without new API calls.
- Introduced TypeScript to the codebase, reducing the number of runtime errors.

### Fingerprints Creative, Chennai – UI Developer

02/2021 – 09/2021

*Creative Agency offering branding & advertising services to promote businesses.*

### Roles and Responsibilities:

- Developed 5+ Responsive web applications using HTML, CSS, JavaScript with cross platform performance.
- Developed 10+ Customized and extended WordPress themes to match client designs and functionality requirements, using HTML, CSS and JavaScript.
- Partnered with 2 designer teams to take client wireframes from conception to implementation.
- Actively participated in back-end development tasks and successfully integrated front-end application with back-end services.
