CHENNAI

OBJECTIVE

Committed to work in creative and challenging environment along with maintaining cutting edge technical skills with up-to date industry and IT infrastructure knowledge. Constantly get to nurture my skills and positively deliver solutions to problems, establish responsibility for Information security in the organization by safeguarding the confidentiality, integrity and availability of information.

PROFESSIONAL SUMMARY

- Having **4.9 years** of Experience in Security Analyst. Well-versed with analysis in SIEM tools
- Splunk and with exposure towards wide range of vulnerabilities and threats. Able to execute with a high degree of success in integrating and solving problems.
- Experience in using SIEM tool Arc sight, Splunk, IBM QRADAR.
- Experience in understanding the logs of various network devices, operating systems.
- Expertise in defining resources like Dash Boards, Data Monitors, Active Channels, threats, open vas, etc.
- Investigating and creating a case for the security threat sand forwarding to the Onsite soc team for further investigation and action.
- Performing Log analysis & analyzing he crucial alerts on an immediate basis.
- Recognizing attacks based on their signatures.
- Monitoring and carrying out second-level analysis incidents.
- Take immediate remediation on the Bad Threat Intel IOC's includes IP'S, URLs, etc.,
- Demonstrated experience in Black listing the required countries and IOC in the firewalls, EmailSecurity, EDR, etc.,
- Identify and prioritize current vulnerabilities in client environments based on analysis from security instrumentation.
- Take, direct, or recommend counter measure actions to mitigate vulnerabilities and interdict threatactivity.
- Maintain state on current cyber threat actor techniques, tactics and procedures.
- Work with security architecture and engineering partners to develop and improve current and future analytic needs.
- Knowledge of information security frame works and standard issue has PCIDSS, ISO27001/2, NIST and their application in to diverse environment
- Establish and maintain analytical repeatable processes and assisting continuous improvement of those processes.
- Proactively work with vendors on P1 issues and finding the Root cause also excel in taking Remediation's in the client Environment.
- Perform quality assurance functions to ensure client satisfaction
- Participate in client service calls to assist in successful client out comes

TOOLS & TECHNOLOGIES

- DLP, Crowd Strike, Carbon Black.
- Security Operation Center
- **SIEM Tool:** Qradar, Azure sentinel, Splunk
- **Endpoint security:** Symantec& Trend Micro. Ticketing Tool: Service Now
- Vulnerability Management: Nessus& Qualys
- **Email Security:** Proof point & Symantec
- **Project Management:** InfoSec, MSS & GSOC **Other Tools:** O365 ATP

EXPERIENCE

SECURITY ANALYST at MICROLAND | CHENNAI OCT 2018 – PRESENT

Working as a Security Analyst and intended to continuously monitor and improve an posture while Preventing, Detecting, Analyzing, and responding to Cyber Security Incidents.

ROLES & RESPONSIBILITIES

- Monitoring alerts triggered from sentinel and by analyzing logs and by taking necessary actions with respect to alerts and remediate the alerts by meeting SLA
- Worked on SNOW incidents creation to closing and Updating IOC s In Threat Intelligence in Sentinel.
- Supporting L1, for incident response & Identifying and understanding the incident based on to determine whether it false or true positive, ruling out false positive and fine tuning the rules.
- Performed Use Cases query development in Azure Sentinel for Internal and Client Engagements
- Created Play book for Azure Sentinel to automate tasks.
- Created Firewall rules in Azure (Network & Application Rules).
- Performing Real-Time Monitoring, Investigation, Analysis, Reporting and Escalations of Security Events from Multiple log sources.
- Maintain keen understanding of evolving inter net threat s to ensure the security of client net incidents mitigation which in turn makes the customer business safe and secure.
- Contacting the customers directly in case of high priority incidents and helping the customer in the process of mitigating the attacks.
- Troubleshooting SIEM dashboard issues when there are no reports getting generated or no data available.
- Determine the scope of security incident and its potential impact to client network.
- Filling the Daily health checklist and Installation of Application Software and Antivirus software.
- Installing the Operating Software such as Windows.
- Good knowledge on networking concepts including OSI layers, subnet, TCP/IP, ports, DNS, DHCP etc.
- Good understanding of security solutions like Firewalls, DLP, Anti-virus, IP
- Experience on performing log analysis and analyzing the critical alert immediate basis through Antivirus.
- Handling and Analysis suspicious through EDR Crowd strike.
- Preparing daily, weekly, and monthly report as per client requirement.
- Recommend steps to handle the security incident with all information and supp
- Creation of reports and dashboards and rules fine tuning.
- Mostly worked on broken authentication, Sensitive data exposure, broken access control, XSS, Using components with known vulnerabilities, Insufficient logging and monitoring.
- Creation of reports and dashboards and rules.
- Maintain & Document the application support strategy.

• EDUCATION:

- BSC computer science graduate from Adikavi Nannaya University in 2016

Declaration: I hereby declare that the above-mentioned details are true to the best of my knowledge
