- Experience working in Azure Develops Pipeline and Deployment
- Experience of working in Micro services (.Net Core Web API)
- Experience of working in JavaScript, JQuery, AngularJS
- Use source version control tool GIT and TFS for code base management
- Can Effectively communicate with Client
- Basic knowledge AWS application & Terraform

Technical Skills

Frameworks	:	.NET Framework, ASP.NET MVC, .Net Core, .Net Core Web API, Entity Framework, Angular
Tools	:	Visual Studio IDE, Vs Code IDE, Postman, Soup, Swagger
Programming Languages	:	C#, LINQ, Hibernate
Unit testing	:	MSTest
Operating Systems	:	Windows Family
Scripting Languages	:	JavaScript, JQuery, AnjularJS
Versioning Tool	:	GIT, TFS

Education

B.Sc. In Information Technology (CGPA 8.25/10)

Manonmaniam Sundaranar University, Tirunelveli - 627012,Tamilnadu, India.

Professional Experiences

1. Logicfield Technology Solutions Pvt Ltd, Chennai

Aug 2019 to Apr 2022

Designation: **Software Engineer**

PROJECTS

1. Electronic document management system (EDMS)

Client : Middle East

Environment : ASP.Net 4.0 & 4.5 with C#, SQL SERVER 2014 R2 and JQuery

Role : Developer

An electronic document management system (EDMS) is a framework of tools for managing the creation, use, and storage of documents in multiple formats that are created throughout an organization. Typically, document management refers to a centralized software system that captures and manages both digital files and images of scanned paper documents. Electronic document management systems share many similar features with enterprise content management (ECM) systems however, document management software systems focus on the use and optimization of active documents and structured data, such as Word documents, PDF files, Excel spreadsheets, PowerPoint, emails and other defined formats, whereas ECM systems also manage unstructured content and rich media formats.

Roles & Responsibilities:

- Designed Frontend, Development & Local Testing and SQL Tables.
- Involved in creation and modification Stored Procedure.
- Involved in Implementing UI and Business logic.

2. GBN Marketplace

Client : Middle East

2. Aspire Systems Private Limited(India)

May 2022 to Present

Designation: **Software Engineer**

PROJECTS

1. Back Office Application

Client : Davinci-CloseBO

Environment : C#, ASP.NET MVC, API, ADO.NET, PostgreSQL, LINQ, Hibernate, Angular, Git, Terraform and AWS.

Role : Developer

Our Loan service application is primarily a Back Office application where all the management processes for both consumer and mortgage loans are carried out in an automated manner.

This application supports all loan servicing processes from the opening of a loan until the final payment. Both the periodic, recurring activities such as calculating and charging of due dates or interest on arrears as well as the occasional, incidental activities such as early prepayments or intermediate rate revisions are being conducted in the contract administration and financial sub administration of the solution.

An integrated Batch framework and a Configurator form the crux of the application which takes care of the entire processing.

Roles & Responsibilities:

- Involved in Requirement gathering
- Involved in sprint planning and effort estimation

- Presented sprint demos to the stakeholders
- Involved in high level and low level designing of the application
- Done development and peer reviews
- Done Unit testing as a part of development
- Done QA releases
- Responsible for issue fixes and support call for QA testing
