TEST ANALYST

SKILLS | EXPERTISE

- Java
- Selenium WebDriver
- API Testing
- Cucumber, TestNG, Junit
- POM, Data Driven
- Postman, Rest Assured
- JIRA
- Maven
- Jenkins
- Oracle
- Eclipse, IntelliJ
- Windows Family and Linux

SUMMATION

- Experienced software test engineer with **3.8 years** of expertise in Test Analyst.
- Hands-on experience in developing the framework from scratch and maintaining test automation frameworks using **Selenium WebDriver**.
- Worked with **Rest Assured** to test **APIs** that require different types of authentication mechanisms, such as basic authentication, token-based authentication OAuth.
- I have extensively used **Postman** to test APIs by sending HTTP requests (GET, POST, PUT, DELETE) to various endpoints and validating the responses received
- Writing test scripts using **TestNG** annotations to define test methods and set up test configurations.
- Cucumber to execute test scenarios outlined in the feature files. Have done parallel execution in **cucumber** and , Data Table, **Data Driven** with cucumber from xlsx.

SUMMARY

An accomplished Test Analyst with a strong technical foundation and a passion for delivering high-quality software. Possessing excellent communication skills, this professional effectively collaborates with cross-functional teams and stakeholders to achieve project success.

EDUCATION

- **M.M.E.S Women'S Arts and Science College**

Diploma in Medical Laboratory Technology

EXPERIENCE

Tech Vulcan Solutions India Private Limited, Bangalore

Mar 2020 - Present

PROJECTS

musicMagpie E-Commerce

Current Project

Mar 2021 - Present

musicMagpie is a prominent British-owned online retailer specializing in the purchase and sale of refurbished electronics and a wide range of second-hand items, including computer games, consoles, books, films, and music. The platform focuses on sustainability and affordability, providing customers with access to high-quality pre-owned products.

Responsibilities

Automation Framework Development:

- Designed and implemented an advanced automation framework using **Page Objects**, **Data-Driven** approach, **Maven**, **Selenium WebDriver (Java)**, and **Cucumber**. This allowed for efficient and maintainable test automation.
- Developed and executed Selenium WebDriver automation scripts using Cucumber, writing clear and concise BDD (Behavior-Driven Development) tests with well-defined behaviors and step definitions.
- Proficiently wrote **Cucumber** scenarios in GHERKIN format, ensuring effective communication between technical and non-technical team members.

Web Testing and XPath Handling:

- Expertise in preparing **XPATH** expressions and effectively handling dynamic elements in web applications, ensuring reliable automation across different UI states.

API Testing and Swagger:

- Proficiently analyzed **API** documentation using Swagger, translating it into comprehensive test plans and scenarios.
- Created robust assertions and validations to ensure the accuracy of API responses, including status codes, headers, and payloads.

Defect Management:

- Actively participated in the software development lifecycle by identifying and raising defects in **JIRA** during System Integration Testing (SIT) and User Acceptance Testing (UAT) phases.

Agile Development:

- Thrived in an Agile development environment, actively participating in Daily Scrum meetings, contributing to sprint planning, and ensuring alignment with project goals.

Version Control:

- Responsible for executing code check-in and check-out processes using **Git**, ensuring seamless collaboration and version control.

Reusable Components:

- Spearheaded the creation of reusable automation components, enhancing productivity, and facilitating easier maintenance of test suites.

RXR Realty is a prominent real estate and infrastructure owner, investor, operator, and developer headquartered in New York. The firm's extensive portfolio includes properties and development sites across the United States, with a strong focus on the dynamic real estate market in New York City.

Responsibilities

Agile Ceremonies:

- Actively participated in key Agile ceremonies, including sprint planning, daily stand-up meetings, sprint reviews, and retrospectives, ensuring alignment with project goals and timelines.
- Facilitated team discussions to identify and resolve issues and blockers, fostering a collaborative and problem-solving environment.

Performance Testing:

- Leveraged **JMeter** to conduct comprehensive software performance and reliability testing, ensuring optimal software functionality and responsiveness.

Collaboration with Developers:

- Collaborated closely with developers to ensure code quality, identify potential issues, and facilitate the timely delivery of software releases.

JIRA Configuration:

- Proficiently configured and customized **JIRA** workflows, issue types, and dashboards to align with project-specific needs, enhancing project visibility and workflow efficiency.

Agile Principles:

- Applied Agile principles and methodologies to manage and prioritize product backlog items, optimizing project delivery and customer satisfaction.

Continuous Learning:

- Committed to continuous learning and improvement of skills and knowledge related to Agile practices, JIRA, and JMeter, staying updated with industry best practices.

DECLARATION

I affirm that the information provided in this resume is true, complete, and up to date.
